Professional Summary

Software Engineer with experience in designing, developing, and maintaining enterprise-scale applications for fintech and HR technology clients. Proficient in full-stack development using **.NET Core, Java, Python, Node.js, React, Angular, and TypeScript**, with strong expertise in Microsoft SQL Server, PostgreSQL, and MongoDB. Experienced in building scalable **RESTful APIs, cloud-native applications, third-party integrations, and modern software architectures**. Hands-on experience developing **AI-powered applications** using **CrewAI, LangChain, and Retrieval-Augmented Generation (RAG)**, with a solid foundation in Machine Learning and Deep Learning. Passionate about delivering high-quality, maintainable software while solving complex technical challenges and driving innovation through modern engineering practices.

Experience

Software Engineer, Verdentra – Colombo, Sri Lanka

Nov 2025 – Present

- Working across multiple enterprise client engagements, contributing to the design, development, maintenance, and enhancement of scalable software solutions.
- Currently contributing to **K1X**, a financial technology client, developing and maintaining multiple products including **Aggregator, Creator, and Next Platform**.
- Designing and implementing new features, resolving production issues, and improving application performance across multiple enterprise platforms.
- Developing and integrating third-party services and APIs to extend platform capabilities and support business requirements.
- Developed and deployed Machine Learning and Deep Learning solutions for real-world applications, including data preprocessing and model evaluation.
- Contributing to Verdentra's internal products by developing and enhancing in-house applications and engineering solutions.
- Collaborating with Product Managers, QA Engineers, UI/UX Designers, and fellow Software Engineers in Agile development environments to deliver high-quality software.
- Served as a Technical Speaker at university sessions, conducting workshops on modern AI and data science concepts to mentor aspiring engineers and promote knowledge sharing within the local tech community.

Associate Software Engineer, Verdentra

Dec 2024 – Oct 2025

- Won **1st Place at Verdentra AI HackathonX** for developing and delivering a high-impact, AI-driven client solution.
- Contributed to **Paycor**, an enterprise HR software client, delivering feature development, application maintenance, and product enhancements.
- Engineered scalable Web APIs using **.NET Core**, following Clean Architecture, CQRS, and SOLID principles to ensure high maintainability and testability.
- Built full-stack features with React, Angular, and TypeScript, delivering responsive user interfaces integrated with robust RESTful APIs and Azure cloud services.
- Optimized data layers using Microsoft SQL Server and EF Core by designing efficient database schemas, queries, and stored procedures to improve system performance.
- Contributed to microservices-based systems to enhance scalability and modularity, ensuring reliability through rigorous unit testing with xUnit and Moq.
- Developed LLM-powered solutions using CrewAI, LangChain, and Retrieval-Augmented Generation (RAG) for real-world automation and AI use cases.
- Promoted engineering best practices by conducting peer code reviews and **publishing technical articles** to support internal knowledge sharing and external branding.
- Explored emerging technologies by contributing to high-performance data processing projects using Go and Snowflake.

- Contributed to both internal and client projects, developing efficient, scalable, and user-centric web applications.
- Gained hands-on experience in **.NET Core, React, Material-UI (MUI), and Microsoft SQL Server**, strengthening full-stack development skills.
- Utilized **Azure Active Directory (Azure AD now named Microsoft Entra ID)** to implement secure authentication and access management for enterprise applications.
- Assisted in UI/UX design by creating intuitive, accessible, and responsive user interfaces to enhance the overall user experience.
- Collaborated using **Jira** and **Confluence** to support Agile project management, sprint planning, and effective team communication.
- Followed software engineering best practices to develop clean, maintainable, and scalable code while participating in code reviews and collaborative development.

Professional Freelance Experience

Software Developer

2023 – Present

- Developed custom web applications and AI-powered software solutions for clients across diverse domains.
- Designed and implemented full-stack applications using **.NET Core, React, TypeScript, Python, and Microsoft SQL Server**.
- Built intelligent applications using Large Language Models (LLMs), CrewAI, LangChain, and Retrieval-Augmented Generation (RAG) to automate business workflows and enhance user experiences.
- Developed and deployed Machine Learning and Deep Learning models for prediction, classification, and intelligent automation use cases.
- Collaborated directly with clients to translate business requirements into scalable technical solutions.

Leadership & Community

- **Technical Speaker** at university sessions, delivering workshops on AI, software engineering, and data science concepts.
- Published technical articles on **Medium** covering software engineering and AI topics.
- **Mentored** interns and junior developers through technical guidance, code reviews, and knowledge-sharing sessions.
- Actively participated in **hackathons** and innovation initiatives, contributing AI-driven solutions and collaborative problem-solving.

Education

BSc (Hons) in Information Technology

June 2020 – Sept 2024

Sri Lanka Institute of Information Technology (SLIIT)

Certifications

AI-102: Azure AI Engineer Associate – Microsoft

June 2025

[View Credential](#)**Data Science** – IBM

Feb 2024

[View Credential](#)

Technical Skills

Languages: C#, Java, Python, JavaScript, TypeScript, SQL, C/C++**Backend:** .NET Core, Spring Boot, Node.js, FastAPI, Django, Flask**Frontend & Mobile:** React, Angular, React Native, Flutter, Material UI, Bootstrap, HTML/CSS**Databases:** MSSQL, MySQL, PostgreSQL, MongoDB, Snowflake, Vector Databases**Cloud & DevOps:** Microsoft Azure, AWS, GitHub Actions, Docker, CI/CD, SonarQube**AI / ML / Agents:** CrewAI, LangChain, RAG, LLMs, NLP, Machine Learning, Deep Learning**Testing & Tools:** Playwright, Selenium, Testim, xUnit, Moq**Professional Skills:** Technical Writing, Agile Methodologies, Leadership, Problem Solving
